The values are presented as the means ± standard deviations, medians (interquartile ranges) or n [%]. A *P* value < 0.05 indicated a significant difference. AF, atrial fibrillation; CBA, cryoballoon ablation; KCCQ, Kansas City Cardiomyopathy Questionnaire; LAD, left atrial diameter; LVEF, left ventricular ejection fraction; MLHFQ, Minnesota Living with Heart Failure Questionnaire; NYHA, New York Heart Association; PFA, pulsed field ablation; RFA, radiofrequency ablation.
